

CORPORATE MESSAGE

HYDRAULIC DUMP BODY SAFETY

Always follow all instructions provided by the manufacturer, including preventive maintenance inspections and parts replacement procedures.

Dump bodies should be fully lowered or blocked when being repaired or not in use.

Don't place your body between upraised dump body and the frame or any other part of vehicle or ground without proper blocking

Never perform any maintenance, including cleaning under an upraised dump body, if you are not qualified to do so.

Trucks with dump bodies should always be equipped with positive means of support, permanently attached and capable of locking into position to prevent accidental lowering of the body while maintenance or inspection work is being done.
